### **Impact of Communication Technology on the Social Relationships among Undergraduate Students**

The communication technologies currently in application have the ability to transform the course of developmental psychology through the changes in the social relationships and interactions among people. College students are the ardent users of the new technology, especially the communication technologies. According to Workman, (2008, p. 6) college students are utilizing the communication technologies to identify the factors that affect their social development as well as the characteristics of such factors. Previously, the communication technologies were popularly used by the young people. However, the advancement in digital application has popularized the communication technologies across all age groups, making the discipline part of the popular culture. The most popular form of interaction that utilizes the communication technology is the internet. The internet is being applied for enhancing social relationships among people through the application of the social sites. The communication technology has transformed the characteristics of interaction, relationships, coordination and communication which are different from the face-to-face communication (Kollock & Smith, 2005). The use of the social network sites such as face book, MySpace, email and text messaging has created a shift in the mode of relationships and interactions among the college students. It is the shift in the advancement of the computer technology and change in the communication that has attracted this research. The proposed research addresses two major knowledge gaps related to the adaptation of the foreign students in the U.S. institutions i.e. the lack of information on the impact of technology on the social relations and interactions among the undergraduate students and the lack of information regarding the strategies that should be applied in adjusting to the technological changes while maintaining the normal course of developmental psychology and life activities.
